

Zest Dental Solutions Launches ENCOMPASS All Inclusive LOCATOR Overdenture Solution

Digitally powered overdenture treatment designed to reduce patient visits by 50 percent

Carlsbad, CA – (October 1, 2021) – Zest Dental Solutions, the only manufacturer of the Zest LOCATOR® Family of Abutment Systems, including the Zest LOCATOR Overdenture Implant System, and provider of clinician-trusted dental materials and small equipment, announces the release of ENCOMPASS™, an all-inclusive, digitally powered overdenture treatment solution, through a partnership with Absolute Dental Services. Driven by precision and efficiency, ENCOMPASS can reduce patients visits by 50 percent, while providing them with customized, high-quality overdentures.

Each ENCOMPASS bundle box includes an Absolute NavaGation™ Pilot Guide and treatment plan; two, four, or six all-in-one Zest LOCATOR Implants and Abutments with processing pack; a premium Absolute Forever Denture™; CHAIRSIDE Attachment Processing Material; Denture Removal Tool; CHAIRSIDE Rubber Finishing and Tapered Carbide Burs; Fixation; and a Denture ID microchip. The end result is a comprehensive solution focused on precision and efficiency that is unlike anything else in the industry.

“ENCOMPASS is a game-changer,” said Tom Stratton, Zest Dental Solutions CEO. “Zest is focused on exceptional products that deliver proven and predictable results. We’ve really captured that approach with ENCOMPASS and housed it all in a single box. The clinician now has everything at their fingertips to confidently treat overdenture patients, and they can do it faster and with greater precision, cutting visits in half. These time and cost savings can be passed along to patients and used to drive practice growth.”

Cloud-based, digital workflow delivers enhanced case planning and efficiency for the clinician, streamlining the entire process to help reduce patient visits by as much as 50 percent, thereby freeing up valuable chairtime and creating an overall better patient experience. The ENCOMPASS Pilot Surgical Guide further adds to this precision and consistency, allowing the clinician to maintain the correct depth and placement for optimum overdenture support and patient comfort.

Each ENCOMPASS box also includes a Lucitone 3D Carbon Printed, Absolute Forever Denture. This 3D, custom-printed overdenture is three times stronger than the minimum ISO strength standard for a denture. Created on a Carbon® M2 printer, each overdenture is the perfect combination of precision, strength, and aesthetics. The ability to customize the tissue portion with five different shades of pink adds to the realistic outcome and patient satisfaction. Zest is excited to be partnering with Absolute Dental Services which was the 2019 NADL Lab of the Year and has been in business for 26 years with four US locations.

“Absolute Dental Services is excited to be partnering with Zest,” said Conrad Rensburg, Absolute Dental Services owner. “Our commitment to dental lab precision, consistency and efficiency meshes perfectly with Zest and its commitment to excellence and leadership in the overdenture space. This collaboration has given way to ENCOMPASS, an end-to-end laboratory enabled overdenture solution that promises to deliver patients with best-in-class, customized Absolute overdenture.”

The precision overdentures are then confidently held in place with two, four, or six genuine LOCATOR abutments and implants. The progressive diameter design, self-tapping tip and RBM-treated surface allows the clinician to place Zest implants with confidence in both standard and narrow ridges (available in 2.4, 2.9, 3.5, 3.9, 4.4, and 4.9 mm). When paired with LOCATOR abutments, an unmatched clinical combination is born, one which is globally trusted and universally accepted.
